Multicast routing in datagram internetworks and extended LANs[\[PDF\] from psu.edu](#)

SE. Deering. - ACM Transactions on Computer ... , 1990 - portal.acm.org

... where **address-space constraints** on a particular LAN force a many-to-one **mapping** of internetwork ... changes due to a bridge or LAN coming up or going down, the **multicast** entries in ... When issuing a membership report for group G, a host initializes the destination **address field** to ...

Session directories and scalable Internet multicast address allocation[\[PDF\] from psu.edu](#)

M Handley - Proceedings of the ACM SIGCOMM'98 conference on ... , 1998 - portal.acm.org

... The collected data is not a complete **mapping** of all of the Mbone because some routers do not have unicast routes to the mwatch daemon, but it ... **Multicast Addresses** Allocated before Clash ... One way is for two or more TTLs of sessions fall into the same IPMA **address** partition. ...

An architecture for wide-area multicast routing[\[PDF\] from psu.edu](#)

SE Deering, D Estrin, D Farinacci. - Proceedings of the ... , 1994 - portal.acm.org

... 1.1 Background In the traditional 1P **multicast** model, established by Deering [2], a **multicast address** is assigned to the collection of receivers for a **multicast** group. Senders simply use that **address** as the destination **address** of a packet to reach all members of the group. ...
